About ICAEA

ICAEA is registered as a non-profit organization in BC, Canada with Society Incorporation Number S-0060477 and as a NASBA CPE sponsor in the USA with Sponsor Identification Number 147070.

ICAEA Academic Partner Program Information and Process

1. **Program Overview** :
   The ICAEA Academic Partner Program is designed to advance modern accounting and business education while establishing a global platform for mutual support and knowledge exchange. The program enables universities worldwide to offer high-quality courses in fields such as computer auditing, audit data analytics, digital auditing, business data analytics, and AI auditing, providing students in these disciplines enhanced opportunities in the digital era.
2. **Joining the Program** :
   The program is free for universities to join. However, it is recommended that universities allocate an annual budget to support faculty and students in participating in ICAEA's professional training, certification exams, seminars, conferences, and student competitions. To apply, universities must have a computer lab for teaching and at least two faculty members willing to undergo training to become certified instructors and promote computer auditing education in their country.
3. **Support for Participants** :
   Universities participating in the program will receive ICAEA's assistance in curriculum development, faculty training, and access to online resources. Additionally, ICAEA will help participating universities apply for the educational version of JCAATs—an AI-powered audit software developed by JACKSOFT (Taiwan) Ltd.—to address the global shortage of Computer-Assisted Audit Tools (CAATs) in education and research.
4. **Requirements for Participating Universities** :
   Universities must offer at least one related course per year utilizing JCAATs. They are also encouraged to have students take the International Certified CAATs Practitioner (ICCP) certification exam, organized by ICAEA, which will serve as a key performance indicator (KPI) for the program.
5. **Application Process** :
   If your university is interested, please forward your details to the ICAEA international representative or contact ICAEA directly at icaea@icaea.net. We will guide you through the application process and provide the necessary forms. The ICAEA committee will review your application and facilitate the signing of a Memorandum of Understanding (MOU) between your university and JACKSOFT (an ICAEA local chapter responsible for donating the JCAATs educational software license and providing teaching support). Upon completion, ICAEA will issue an official acceptance letter confirming your participation in the Academic Partner Program.
6. **ICAEA & JACKSOFT Overview** :
   ICAEA is a non-profit organization based in British Columbia, Canada, recognized by the National Association of State Boards of Accountancy (NASBA) in the USA as a sponsor of continuing professional education. Since its launch in London, UK, in 2017, JCAATs software has been widely adopted by industry professionals, accounting firms, and ICCP exam participants. Alongside ACL and IDEA, JCAATs is one of the top three general audit software tools. It is developed by JACKSOFT Ltd., based in Taiwan, with distribution in Tokyo, Seoul, Dubai, and other major cities.

CYUT

CYUT-Jacksoft collaborates to forge AI auditing talents

Big data and AI are transforming businesses and helping companies to improve audits and risk analysis. Cross-disciplinary auditing talents are in great demand. In response to this trend, a collaboration pact was signed between CYUT and Jacksoft Commerce Automation Ltd. (Jacksoft) on 9 Jan to promote RegTech (Regulation Technology) and nurture AI audit talents. Jacksoft is a leading company specializing in RegTech, Computer Auditing, and Enterprise Risk Management. They generously donated JCAATs-AI Audit Software, which costs NT$10 million, to facilitate CYUT's becoming a member of the International Computer Auditing Education Association (ICAEA). The signing ceremony also included a demonstration by Jacksoft to show how the software helps companies practice ESG and move toward sustainable innovation.
